DEMO ACCESS

No password required. Use the role selector for Employee, Manager, and Admin journeys.

ARCHITECTURE ARTIFACT

atombergsolution.pdf

Architecture Diagram

Required Submission Items

Requirement	Submission Detail
Live / hosted demo URL	https://priya123nshu.github.io/atomquest-goal-portal/
Source code repository	https://github.com/Priya123nshu/atomquest-goal-portal
Architecture diagram	This PDF: atombergsolution.pdf
Login credentials / role access	No passwords. Use role selector: Aarav Mehta or Nisha Rao as Employee, Kavya Menon as Manager, Rohan Sethi as Admin / HR.

Implemented BRD Coverage

Goal creation

100% weightage validation

Minimum 10% per goal

Maximum 8 goals

Manager approval

Return for rework

Approval lock

Admin unlock

Shared goals

Quarterly actuals

Check-in comments

Progress scores

Completion dashboard

Achievement CSV export

Audit trail

Escalation monitor

Technology and Hosting Choices

Frontend

Static browser application using HTML, CSS, and JavaScript. This keeps the demo fast, low-cost, and easy for judges to open.

Storage

Browser LocalStorage is used for demo persistence. Production should replace this with a secure API and relational database.

Hosting

GitHub Pages hosts the static demo with no server cost and no deployment complexity.

Governance

Audit events are captured for key changes, including approvals, unlocks, exports, hierarchy updates, and post-lock edits.

Demo Flow for Evaluators

1. Select Employee and create or submit goals during Phase 1.
2. Select Manager to approve, edit inline, or return the submitted sheet.
3. Select Admin to switch the active window to Q1, Q2, Q3, or Q4.
4. Select Employee to update achievement and status for the active quarter.
5. Select Manager to save the quarterly check-in comment.
6. Open Reports to review achievement, completion, audit trail, and export CSV.
